PROFILE

Seeking challenging opportunities to utilize my technical expertise and creativity to develop innovative mobile applications because I believe that even a diamond is useless if not placed at the right place.

PROJECTS

Greengen (App for an Italian Construction Company)

- Developed an Android and iOS application using Flutter for uploading and fetching user information and images to/from a RESTful API
- Implemented user authentication and secure image uploading.
- Utilized Flutter's UI components and custom widgets to create an engaging user interface.

Stranded (Car Towing App)

- Created a cross-platform mobile application using Flutter that allows users to request car towing services in case of emergencies
- Ensured smooth user experience through a clean and intuitive interface.

Squip (Emergency Help App)

- Designed and developed a safety application using Flutter to provide users with emergency assistance and location sharing capabilities.
- Incorporated Firebase firestore database.
- Integrated Google Maps.

Weather App

- Fetching real-time weather data through the OpenWeather API by tracking the device's location
